

## **RF Exposure**

### **Applicable Standard**

According to §1.1307(b)(5), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline. This is a Portable device. The **Section 4.3.1 and Appendix A of KDB447498 D01 V05 was used as the guidance.**

### **Calculation Result (Worse Case):**

Worse case : 5.93dBm(3.92mW) at 2437MHz

$$\left[ \frac{\text{max. power of channel, including tune-up tolerance, mW}}{(\text{min. test separation distance, mm})} \right] \cdot [\sqrt{f(\text{GHz})}] = 3.92/5 * 1.56 = 1.22$$
 this value is less than 3.0 for 1-g SAR and  $\leq 7.5$  for 10-g extremity SAR.

**The SAR measurement is not necessary.**
